

Transform managers into leaders with PI Perform

Give your managers valuable insights

Being a manager has never been harder. Most are juggling too many people and projects and have too little time and training to properly prioritize all the work.

PI Perform provides managers with a collaborative environment to apply functional management skills, allowing them to balance projects, people, and their own development.

Armed with multiple tools inside of Perform, managers can tackle some of the businesses most challenging problems:

- Aligning corporate goals with measurable actions at all levels
- Providing a continuous feedback loop between employees and management
- Creating an environment that combines behavioral insights with functional outcomes

Personalized Insights

Managers leverage the power of PI to align behavioral insights with functional 1:1 relationships.

Equipped with actionable insights, managers can

- foster better relationships
- create more meaningful meetings
- provide targeted coaching and feedback
- align goals with clear actions

Give managers a best-practice leadership system with PI Perform, which fits seamlessly into their day-to-day, combining relationship building and meeting management with goals, feedback, and recognition, to drive performance every day.
